Memory & Reading Companion

Topic 4 - SL Ch4 Water Part 1

Chunked reading layouts, syllable and word-part decoding, visual anchors, and low-load sentence starters.

Unit Scope	Topic 4 - SL Ch4 Water Part 1
Syllabus Objectives	4.1.1-4.1.4, 4.1.4-4.1.6, 4.1.5, 4.1.6, 4.2.1-4.2.2, 4.2.3, 4.2.3-4.2.4, 4.2.6-4.2.7, 4.2.8, 4.3.1-4.3.5
Reading Format	Calibri 12 pt · 1.45x spacing · Short lines · Zero italics
Print Layout	Every lesson sits on one double-sided 2-page spread (pp. 3+)

How to Use This Companion

- Read the three bold-first ideas beside the diagram first.
- Tap out word syllables silently or during pre-teaching and highlight each bold stressed part.
- Match each numbered clue (1 to 4) to its matching letter without copying long spellings.
- Complete the Cause -> Effect sentence frame and review it quietly or with a partner.

Lesson Print Index (Two Pages Per Lesson)

Every lesson begins on an odd page so teachers can print a single 2-page spread. Print the two odd-to-even pages listed below for any single lesson as one double-sided sheet.

Lesson	Topic Title	Objectives	Pages
Lesson 1	Water stores and flows	4.1.1-4.1.4	pp. 3-4
Lesson 2	Land use and water movement	4.1.5	pp. 5-6
Lesson 3	Water budgets and sustainable abstraction	4.1.6	pp. 7-8
Lesson 4	Runoff model practical	4.1.4-4.1.6	pp. 9-10
Lesson 5	Water security and scarcity	4.2.1-4.2.2	pp. 11-12
Lesson 6	Increasing water supply	4.2.3-4.2.4	pp. 13-14
Lesson 7	Reducing water demand	4.2.6-4.2.7	pp. 15-16
Lesson 8	Singapore water management	4.2.8	pp. 17-18
Lesson 9	Water-use audit	4.2.3	pp. 19-20
Lesson 10	Aquatic food webs and fisheries	4.3.1-4.3.5	pp. 21-22

Academic Connectors & Personal Language Gloss

Connector Word	Job in an Exam Answer	My Home-Language Gloss
because / since	Gives the scientific cause or mechanism	
leads to / triggers	Links an earlier step to the next process	
so / therefore / as a result	States the final measurable effect	
whereas / unlike	Marks a direct contrast between two items

IB DP ESS (2026) · SL Core **Name:** _____ **Date:** _____

Lesson 1: Water stores and flows

Objectives (4.1.1-4.1.4): Solar energy drives evaporation. Gravity drives drainage

Key Ideas (Read First)

- **Solar energy drives** evaporation. Gravity drives drainage
- **Oceans contain most** water. Accessible surface freshwater is a tiny share
- **Water moves through** transfers and changes state through transformations

Water stores and flows

Word Decoding Bank (Tap the Syllables)

Infiltration capacity -> in · fil · **tra** · tion ca · pa · **ci** · ty

Meaning: Maximum rate at which soil absorbs precipitation | Sound cue: in · fil · tra · shun · ca · pa · **ci** · ty | L1: _____

Impervious surface -> im · **per** · vious **sur** · face

Meaning: Artificial ground cover preventing water infiltration | Sound cue: im · per · vious · **sur** · face | L1: _____

Peak discharge -> peak **dis** · charge

Meaning: Maximum stream volume flowing per unit time | L1: _____

Match Each Clue (Write Letter A to D)

1. [ ] time delay between peak rainfall and peak discharge

2. [ ] maximum stream volume flowing per unit time

3. [ ] artificial ground cover preventing water infiltration

4. [ ] maximum rate at which soil absorbs precipitation

Word Bank Choices

A. im · **per** · vious **sur** · face

B. lag time

C. in · fil · **tra** · tion ca · pa · **ci** · ty

D. peak **dis** · charge

Build Your Sentence (Cause -> Effect)

Prompt: Explain one key mechanism from Water stores and flows.

Connectors: because / since · leads to · therefore / as a result · whereas

1. Context: Solar energy drives evaporation. Gravity drives drainage

2. Cause: Because of infiltration capacity, _____ triggers a measurable change.

3. Effect: As a result, impervious surface _____.

_____

_____

Whisper / Partner Self-Check

Focus term (tap syllables quietly): in · fil · **tra** · tion ca · pa · **ci** · ty

- Read your completed sentence silently or check it with a partner / TA.
- [ ] Used exact key terms with clear spelling
- [ ] Linked cause to effect using 'because' or 'therefore'

IB DP ESS (2026) · SL Core **Name:** _____ **Date:** _____

Lesson 2: Land use and water movement

Objectives (4.1.5): Vegetation intercepts rain and returns water by transpiration

Key Ideas (Read First)

- **Vegetation intercepts rain** and returns water by transpiration
- **Impermeable surfaces reduce** infiltration
- **Faster runoff can** increase flood peaks

Check Question

Vegetation intercepts rain and returns water by transpiration

Word Decoding Bank (Tap the Syllables)

Transpiration -> tran · spi · **ra** · tion

Word parts: Latin trans (across or through) + spirare (to breathe)

Meaning: The physiological evaporation of water vapour from plant aerial tissues, predominantly through foliar stomata | Sound cue: tran · spi · **ra** · shun | L1: _____

Infiltration -> in · fil · **tra** · tion

Word parts: Latin in (into) + Medieval Latin filtrare (to pass through felt)

Meaning: The physical process by which water on the ground surface enters the upper soil layer | Sound cue: in · fil · **tra** · shun | L1: _____

Percolation -> per · co · **la** · tion

Word parts: Latin per (through) + colare (to strain or filter)

Meaning: The downward movement of water through saturated soil layers and porous rock strata under. | Sound cue: per · co · **la** · shun | L1: _____

Match Each Clue (Write Letter A to D)

1. [ ] The downward movement of water through saturated soil layers and porous rock strata under.

2. [ ] The physical process by which water on the ground surface enters the upper soil.

3. [ ] The physiological evaporation of water vapour from plant aerial tissues, predominantly through foliar stomata

4. [ ] The distinct interface zone between terrestrial land and a surface river, stream, or freshwater.

Word Bank Choices

A. in · fil · **tra** · tion

B. ri · **pa** · rian

C. per · co · **la** · tion

D. tran · spi · **ra** · tion

Build Your Sentence (Cause -> Effect)

Prompt: Explain one key mechanism from Land use and water movement.

Connectors: because / since · leads to · therefore / as a result · whereas

1. Context: Vegetation intercepts rain and returns water by transpiration

2. Cause: Because of transpiration, _____ triggers a measurable change.

3. Effect: As a result, infiltration _____.

Whisper / Partner Self-Check

Focus term (tap syllables quietly): tran · spi · **ra** · tion

- Read your completed sentence silently or check it with a partner / TA.
- [ ] Used exact key terms with clear spelling
- [ ] Linked cause to effect using 'because' or 'therefore'

IB DP ESS (2026) · SL Core **Name:** _____ **Date:** _____

Lesson 3: Water budgets and sustainable abstraction

Objectives (4.1.6): Storage change equals inputs minus outputs

Key Ideas (Read First)

- **Storage change equals** inputs minus outputs
- **Abstraction is an** output
- **A sustainable rate** must also protect environmental flows and quality

Check Question

Storage change equals inputs minus outputs

Word Decoding Bank (Tap the Syllables)

Thermohaline circulation -> ther · mo · **ha** · line cir · cu · **la** · tion

Meaning: Deep-ocean conveyor driven by temperature and salinity density differences | Sound cue: ther · mo · ha · line · cir · cu · **la** · shun | L1: _____

Evapotranspiration -> e · vap · o · tran · spi · **ra** · tion

Word parts: Latin e/ex (out) + vapor (steam) + trans (across) + spirare (to breathe)

Meaning: The combined total flux of water returning to the atmosphere via physical evaporation from soil. | Sound cue: e · vap · o · tran · spi · **ra** · shun | L1: _____

Salinisation -> sal · i · ni · **sa** · tion

Word parts: Latin sal (salt)

Meaning: The accumulation of water-soluble mineral salts in upper soil profiles or aquifers, frequently induced. | Sound cue: sal · i · ni · **sa** · shun | L1: _____

Match Each Clue (Write Letter A to D)

1. [ ] The combined total flux of water returning to the atmosphere via physical evaporation.

2. [ ] The accumulation of water-soluble mineral salts in upper soil profiles or aquifers, frequently induced.

3. [ ] deep-ocean conveyor driven by temperature and salinity density differences

4. [ ] ocean layer where water density increases rapidly with depth

Word Bank Choices

A. pyc · **noc** · line

B. ther · mo · **ha** · line cir · cu · **la** · tion

C. e · vap · o · tran · spi · **ra** · tion

D. sal · i · ni · **sa** · tion

Build Your Sentence (Cause -> Effect)

Prompt: Explain one key mechanism from Water budgets and sustainable abstraction.

Connectors: because / since · leads to · therefore / as a result · whereas

1. Context: Storage change equals inputs minus outputs

2. Cause: Because of thermohaline circulation,

_____ triggers a measurable change.

3. Effect: As a result, evapotranspiration

_____.

_____

_____

Whisper / Partner Self-Check

Focus term (tap syllables quietly): ther · mo · **ha** · line cir · cu · **la** · tion

- Read your completed sentence silently or check it with a partner / TA.
- [ ] Used exact key terms with clear spelling
- [ ] Linked cause to effect using 'because' or 'therefore'

IB DP ESS (2026) · SL Core **Name:** _____ **Date:** _____

Lesson 4: Runoff model practical

Objectives (4.1.4-4.1.6): A model comparison should change one factor at a time

Key Ideas (Read First)

- **A model comparison** should change one factor at a time
- **Measure both runoff** volume and collection time
- **Model results need** cautious transfer to real catchments

Check Question

A model comparison should change one factor at a time

Word Decoding Bank (Tap the Syllables)

Specific energy consumption -> spe · **ci** · fic e · **ner** · gy con · **sum** · ption

Meaning: Electricity consumed per volume of freshwater produced | L1: _____

Water reclamation -> **wa** · ter rec · la · **ma** · tion

Meaning: Advanced purification of municipal wastewater to potable standards | Sound cue: wa · ter · rec · la · **ma** · shun | L1: _____

Dissolved oxygen -> **dis** · solved o · **xy** · gen

Meaning: Free non-compound oxygen dissolved in water | Sound cue: dis · solved · o · **xy** · gen | L1: _____

Match Each Clue (Write Letter A to D)

1. [ ] total dissolved mineral salts in seawater

2. [ ] free non-compound oxygen dissolved in water

3. [ ] electricity consumed per volume of freshwater produced

4. [ ] advanced purification of municipal wastewater to potable standards

Word Bank Choices

A. spe · **ci** · fic e · **ner** · gy con · **sum** · ption

B. **wa** · ter rec · la · **ma** · tion

C. sa · li · **ni** · ty

D. **dis** · solved o · **xy** · gen

Build Your Sentence (Cause -> Effect)

Prompt: Explain one key mechanism from Runoff model practical.

Connectors: because / since · leads to · therefore / as a result · whereas

1. Context: A model comparison should change one factor at a time

2. Cause: Because of specific energy consumption,

_____ triggers a measurable change.

3. Effect: As a result, water reclamation

_____.

_____

_____

Whisper / Partner Self-Check

Focus term (tap syllables quietly): spe · **ci** · fic e · **ner** · gy con · **sum** · ption

- Read your completed sentence silently or check it with a partner / TA.
- [ ] Used exact key terms with clear spelling
- [ ] Linked cause to effect using 'because' or 'therefore'

IB DP ESS (2026) · SL Core **Name:** _____ **Date:** _____

Lesson 5: Water security and scarcity

Objectives (4.2.1-4.2.2): Water security requires sufficient safe accessible water

Key Ideas (Read First)

- **Water security requires** sufficient safe accessible water
- **Physical scarcity concerns** limited available water
- **Economic scarcity concerns** inadequate infrastructure or access

Check Question

Water security requires sufficient safe accessible water

Word Decoding Bank (Tap the Syllables)

Specific energy consumption -> spe · **ci** · fic e · **ner** · gy con · **sum** · ption

Meaning: Electricity consumed per volume of freshwater produced | L1: _____

Water reclamation -> **wa** · ter rec · la · **ma** · tion

Meaning: Advanced purification of municipal wastewater to potable standards | Sound cue: wa · ter · rec · la · **ma** · shun | L1: _____

Water security -> **wa** · ter se · cu · **ri** · ty

Meaning: Reliable access to sufficient quantities of acceptable quality water | Sound cue: wa · ter · se · cu · **ri** · ty | L1: _____

Match Each Clue (Write Letter A to D)

1. [ ] electricity consumed per volume of freshwater produced

2. [ ] advanced purification of municipal wastewater to potable standards

3. [ ] membrane separation forcing water through pores against osmotic pressure

4. [ ] reliable access to sufficient quantities of acceptable quality water

Word Bank Choices

A. **wa** · ter rec · la · **ma** · tion

B. **re** · verse os · **mo** · sis

C. **wa** · ter se · cu · **ri** · ty

D. spe · **ci** · fic e · **ner** · gy con · **sum** · ption

Build Your Sentence (Cause -> Effect)

Prompt: Explain one key mechanism from Water security and scarcity.

Connectors: because / since · leads to · therefore / as a result · whereas

1. Context: Water security requires sufficient safe accessible water

2. Cause: Because of specific energy consumption, _____ triggers a measurable change.

3. Effect: As a result, water reclamation _____.

_____

_____

Whisper / Partner Self-Check

Focus term (tap syllables quietly): spe · **ci** · fic e · **ner** · gy con · **sum** · ption

- Read your completed sentence silently or check it with a partner / TA.
- [ ] Used exact key terms with clear spelling
- [ ] Linked cause to effect using 'because' or 'therefore'

IB DP ESS (2026) · SL Core **Name:** _____ **Date:** _____

Lesson 6: Increasing water supply

Objectives (4.2.3-4.2.4): Dams store water but alter river systems

Key Ideas (Read First)

- **Dams store water** but alter river systems
- **Desalination removes salts** and needs energy
- **Rainwater harvesting and** wetland protection can support supply

Check Question

Dams store water but alter river systems

Word Decoding Bank (Tap the Syllables)

Transboundary basin -> tran · sboun · **da** · ry **ba** · sin

Meaning: River catchment shared across sovereign international political borders | Sound cue: tran · sboun · da · ry · **ba** · sin | L1: _____

Water security -> **wa** · ter se · cu · **ri** · ty

Meaning: Reliable access to sufficient quantities of acceptable quality water | Sound cue: wa · ter · se · cu · **ri** · ty | L1: _____

Desalination -> de · sal · i · **na** · tion

Word parts: Latin de (away from) + sal (salt)

Meaning: Industrial separation processes (reverse osmosis, thermal distillation) that remove dissolved mineral salts from saline. | Sound cue: de · sal · i · **na** · shun | L1: _____

Match Each Clue (Write Letter A to D)

1. [ ] Industrial separation processes (reverse osmosis, thermal distillation) that remove dissolved mineral salts from saline.

2. [ ] membrane separation forcing water through pores against osmotic pressure

3. [ ] reliable access to sufficient quantities of acceptable quality water

4. [ ] river catchment shared across sovereign international political borders

Word Bank Choices

A. **wa** · ter se · cu · **ri** · ty

B. de · sal · i · **na** · tion

C. tran · sboun · **da** · ry **ba** · sin

D. **re** · verse os · **mo** · sis

Build Your Sentence (Cause -> Effect)

Prompt: Explain one key mechanism from Increasing water supply.

Connectors: because / since · leads to · therefore / as a result · whereas

1. Context: Dams store water but alter river systems

2. Cause: Because of transboundary basin, _____ triggers a measurable change.

3. Effect: As a result, water security _____.

_____

_____

Whisper / Partner Self-Check

Focus term (tap syllables quietly): tran · sboun · **da** · ry **ba** · sin

- Read your completed sentence silently or check it with a partner / TA.
- [ ] Used exact key terms with clear spelling
- [ ] Linked cause to effect using 'because' or 'therefore'

IB DP ESS (2026) · SL Core **Name:** _____ **Date:** _____

Lesson 7: Reducing water demand

Objectives (4.2.6-4.2.7): Domestic conservation can reduce avoidable use

Key Ideas (Read First)

- **Domestic conservation can** reduce avoidable use
- **Efficient irrigation and** crop choices influence agricultural demand
- **Efficiency gains can** be offset if total activity expands

Check Question

Domestic conservation can reduce avoidable use

Word Decoding Bank (Tap the Syllables)

Equitable utilisation -> e · **qui** · table u · ti · li · **sa** · tion

Meaning: International legal doctrine balancing fair water use among riparians | Sound cue: e · qui · table · u · ti · li · **sa** · shun | L1: _____

Transboundary basin -> tran · sboun · **da** · ry **ba** · sin

Meaning: River catchment shared across sovereign international political borders | Sound cue: tran · sboun · da · ry · **ba** · sin | L1: _____

Impoundment rate -> im · **poun** · dment rate

Meaning: Annual volume of streamflow captured behind a dam | Sound cue: im · **poun** · dment · rate | L1: _____

Match Each Clue (Write Letter A to D)

1. [ ] river catchment shared across sovereign international political borders

2. [ ] annual volume of streamflow captured behind a dam

3. [ ] water extracted from a catchment that is not returned to streamflow

4. [ ] international legal doctrine balancing fair water use among riparians

Word Bank Choices

A. im · **poun** · dment rate

B. e · **qui** · table u · ti · li · **sa** · tion

C. tran · sboun · **da** · ry **ba** · sin

D. con · **sum** · ptive use

Build Your Sentence (Cause -> Effect)

Prompt: Explain one key mechanism from Reducing water demand.

Connectors: because / since · leads to · therefore / as a result · whereas

1. Context: Domestic conservation can reduce avoidable use

2. Cause: Because of equitable utilisation, _____ triggers a measurable change.

3. Effect: As a result, transboundary basin _____.

_____

_____

Whisper / Partner Self-Check

Focus term (tap syllables quietly): e · **qui** · table u · ti · li · **sa** · tion

- Read your completed sentence silently or check it with a partner / TA.
- [ ] Used exact key terms with clear spelling
- [ ] Linked cause to effect using 'because' or 'therefore'

IB DP ESS (2026) · SL Core **Name:** _____ **Date:** _____

Lesson 8: Singapore water management

Objectives (4.2.8): Singapore combines catchment water, imports, NEWater and desalination

Key Ideas (Read First)

- **Singapore combines catchment** water, imports, NEWater and desalination
- **Diversification reduces dependence** on one source
- **Water treatment, energy** demand and public trust remain important

Check Question

Singapore combines catchment water, imports, NEWater and desalination

Word Decoding Bank (Tap the Syllables)

Equitable utilisation -> e · **qui** · table u · ti · li · **sa** · tion

Meaning: International legal doctrine balancing fair water use among riparians | Sound cue: e · qui · table · u · ti · li · **sa** · shun | L1: _____

Maximum sustainable yield -> ma · **xi** · mum sus · **tai** · nable yield

Meaning: Highest annual harvest harvested without depleting the breeding stock | L1: _____

Desalination -> de · sal · i · **na** · tion

Word parts: Latin de (away from) + sal (salt)

Meaning: Industrial separation processes (reverse osmosis, thermal distillation) that remove dissolved mineral salts from saline. | Sound cue: de · sal · i · **na** · shun | L1: _____

Match Each Clue (Write Letter A to D)

1. [ ] Industrial separation processes (reverse osmosis, thermal distillation) that remove dissolved mineral salts from saline.

2. [ ] water extracted from a catchment that is not returned to streamflow

3. [ ] international legal doctrine balancing fair water use among riparians

4. [ ] highest annual harvest harvested without depleting the breeding stock

Word Bank Choices

A. ma · **xi** · mum sus · **tai** · nable yield

B. e · **qui** · table u · ti · li · **sa** · tion

C. de · sal · i · **na** · tion

D. con · **sum** · ptive use

Build Your Sentence (Cause -> Effect)

Prompt: Explain one key mechanism from Singapore water management.

Connectors: because / since · leads to · therefore / as a result · whereas

1. Context: Singapore combines catchment water, imports, NEWater and desalination

2. Cause: Because of equitable utilisation, _____ triggers a measurable change.

3. Effect: As a result, maximum sustainable yield _____.

_____

_____

Whisper / Partner Self-Check

Focus term (tap syllables quietly): e · **qui** · table u · ti · li · **sa** · tion

- Read your completed sentence silently or check it with a partner / TA.
- [ ] Used exact key terms with clear spelling
- [ ] Linked cause to effect using 'because' or 'therefore'

IB DP ESS (2026) · SL Core **Name:** _____ **Date:** _____

Lesson 9: Water-use audit

Objectives (4.2.3): An audit measures a defined activity and period

Key Ideas (Read First)

- **An audit measures** a defined activity and period
- **Use direct measurements** where safe and avoid personal disclosures
- **Check overlap before** adding savings

Check Question

An audit measures a defined activity and period

Word Decoding Bank (Tap the Syllables)

Maximum sustainable yield -> ma · **xi** · mum sus · **tai** · nable yield

Meaning: Highest annual harvest harvested without depleting the breeding stock | L1: _____

Carrying capacity -> **car** · rying ca · pa · **ci** · ty

Meaning: Maximum population biomass an ecosystem supports sustainably | Sound cue: car · rying · ca · pa · **ci** · ty | L1: _____

Spawning stock biomass -> **spaw** · ning stock **bio** · mass

Meaning: Total mass of mature fish capable of reproduction | L1: _____

Match Each Clue (Write Letter A to D)

1. [ ] Industrial separation processes (reverse osmosis, thermal distillation) that remove dissolved mineral salts from saline.

2. [ ] highest annual harvest harvested without depleting the breeding stock

3. [ ] maximum population biomass an ecosystem supports sustainably

4. [ ] total mass of mature fish capable of reproduction

Word Bank Choices

A. **car** · rying ca · pa · **ci** · ty

B. **spaw** · ning stock **bio** · mass

C. de · sal · i · **na** · tion

D. ma · **xi** · mum sus · **tai** · nable yield

Build Your Sentence (Cause -> Effect)

Prompt: Explain one key mechanism from Water-use audit.

Connectors: because / since · leads to · therefore / as a result · whereas

1. Context: An audit measures a defined activity and period

2. Cause: Because of maximum sustainable yield, _____ triggers a measurable change.

3. Effect: As a result, carrying capacity _____.

_____

_____

Whisper / Partner Self-Check

Focus term (tap syllables quietly): ma · **xi** · mum sus · **tai** · nable yield

- Read your completed sentence silently or check it with a partner / TA.
- [ ] Used exact key terms with clear spelling
- [ ] Linked cause to effect using 'because' or 'therefore'

IB DP ESS (2026) · SL Core **Name:** _____ **Date:** _____

Lesson 10: Aquatic food webs and fisheries

Objectives (4.3.1-4.3.5): Phytoplankton and macrophytes support aquatic production

Key Ideas (Read First)

- **Phytoplankton and macrophytes** support aquatic production
- **Harvest can exceed** replacement and reduce stocks
- **Destructive fishing can** damage habitats as well as target populations

Check Question

Phytoplankton and macrophytes support aquatic production

Word Decoding Bank (Tap the Syllables)

Feed conversion ratio -> feed con · **ver** · sion **ra** · tio

Meaning: Mass of dry feed required to produce one unit mass of fish biomass | L1: _____

Spawning stock biomass -> **spaw** · ning stock **bio** · mass

Meaning: Total mass of mature fish capable of reproduction | L1: _____

Phytoplankton -> phy · to · **plank** · ton

Word parts: Greek phyton (plant) + planktos (drifting or wandering)

Meaning: Microscopic autotrophic organisms inhabiting the sunlit upper layer of aquatic systems, serving as the primary. | Sound cue: fy · to · **plank** · ton | L1: _____

Match Each Clue (Write Letter A to D)

1. [ ] Microscopic autotrophic organisms inhabiting the sunlit upper layer of aquatic systems, serving.

2. [ ] total mass of mature fish capable of reproduction

3. [ ] composite measure of fleet capacity, gear efficiency and operating days

4. [ ] mass of dry feed required to produce one unit mass of fish biomass

Word Bank Choices

A. **spaw** · ning stock **bio** · mass

B. **fis** · hing **ef** · fort

C. feed con · **ver** · sion **ra** · tio

D. phy · to · **plank** · ton

Build Your Sentence (Cause -> Effect)

Prompt: Explain one key mechanism from Aquatic food webs and fisheries.

Connectors: because / since · leads to · therefore / as a result · whereas

1. Context: Phytoplankton and macrophytes support aquatic production

2. Cause: Because of feed conversion ratio, _____ triggers a measurable change.

3. Effect: As a result, spawning stock biomass _____.

_____

_____

Whisper / Partner Self-Check

Focus term (tap syllables quietly): feed con · **ver** · sion **ra** · tio

- Read your completed sentence silently or check it with a partner / TA.
- [ ] Used exact key terms with clear spelling
- [ ] Linked cause to effect using 'because' or 'therefore'
